

Product Data Sheet

One Step Soil Conditioner

What is One Step:

One Step soil conditioner is a premium soil conditioner, amendment and mulch consisting of our ground southern yellow pine bark, leaf mulch, hardwood fines, organic compost, nutrient additives and supplements. It improves tilth, condition and structure of soil, providing better aeration and drainage. Supports living soil-organisms and improves ability of soil to hold water and nutrients.

Excellent for:

Preparing landscape beds for annuals, perennials, ground covers and shrubs.

How to use it:

Till in a 2-3" layer to 12" depth and plant. May also be used as a mulch after planting by installing a 2-3" layer over the amended soil surface. This layer can be replenished as needed or cultivated into the soil when replanting.

Available in:

2 cy totes, 1.5 cf bags and Bulk (made and bagged to order)

Technical Data:

Particle size less than 3/8" (9.5 mm)	minimum 85%
Nitrogen5-1.25%
Bulk density (dry).....	350-450 #/cy
Bulk density (as received).....	700-850 #/cy
Organic matter.....	minimum 60%
C/N Ratio.....	< 60
pH.....	6.0-7.0
