

Product Data Sheet

Premium Hardwood Bark Mulch

What is Premium Hardwood Bark Mulch:

Midwest Trading's Premium Hardwood Bark Mulch is sourced from paper chip and lumber mills in Mississippi, Alabama, Tennessee and Arkansas. The bark comes from a blend of hardwood species indigenous to the area. The logs are debarked at the mill and the bark is loaded onto barges for delivery to our yard in Ottawa, IL. The bark is off loaded and stockpiled. Prior to shipment the bark is reground and loaded onto trucks for delivery. We do not blend any wood waste or other foreign material into our premium bark products.

Excellent for:

Premium Hardwood Bark Mulch, when spread correctly, reduces water loss, prevents erosion and minimizes weed growth. Premium Hardwood Bark Mulch evens out soil temperature which helps prevent damage from the freeze-thaw cycle and mitigates winter heaving. This is easy-to-handle mulch for all season benefits.

Available in:

2cf Bags and Bulk

Technical Data:

pH	5.0-6.5
EC.....	0.1-0.5 dS/m ⁽²⁾
Organic Matter content.....	90-98%
Bulk density (as received).....	600-900 lbs/cy
