CM90

Pine Based Grower's Mix

Product Description:

CM-90 is a pine based professional growing media designed for longer term crops, perennials and shrubs in gallon containers and larger. Coarse and fine southern pine bark is used to provide proper particle size distribution promoting long term stability and structure. Canadian sphagnum peat moss is used to maintain water retention throughout cropping time. Bluechip (38-0-0) is included to stabilize the organic matter in blends to prevent any nitrogen immobilization. A fertility program is advised through liquid feed, top-dressed CRF or utilize incorporated CRF, contact Midwest Trading Sales team for more information.

150-250	50-100	50-100	200-300	<0.5

Midwest Trading Partners with Waypoint Analytical to run extractable nutrient analysis to determine mix suitability. An "A17" analysis is available for every production run that can serve as a tool for cultural practices at time of receipt. This analysis provides a reading of nutrient availability at time of manufacturing and can vary based on moisture, temperature, and time. Ranges are approximated based on laboratory analysis.
