Greenhouse Mix Program

Why Partner with Midwest Trading For Your Grower's Mixes?

Midwest Trading has a long history of providing media to our sister company, Midwest Groundcovers, which produces over 20 million containers annually. Through years of partnering with the finest growers, we have formulated professional growing media for all types of production – ranging in size from plugs to large containers. We source the highest quality raw ingredients for our mixes because using premium grade ingredients produces the finest finished products. Our standard mixes are thoroughly tested, both internally and by a third party lab, to provide you with a consistent growing mix. Any mix can be tailored to meet your needs; controlled release fertilizer or Rootshield® can be added upon request. Let Midwest Trading partner in your growing success!

Inside Sales / Customer Service
630-365-1990

- ▶ Mixes are produced locally in the Midwest and made fresh for your order, available in bulk, bags or totes – pick-up or delivery!
- ▶ Stringent quality procedures for producing mixes: Quality Assurance oversees production process and Quality Control monitors and tests the products
- ▶ Experienced Shipping & Logistics Team work to meet your scheduling requirements to get you what you want, when you need it
- ▶ Over 30 delivery trucks during peak season to ensure timely delivery

Flat & Pack Group

Peat based mixes are designed for use in flats and 4"-12" container production

80/20 Mix

Description & Ideal Uses: General greenhouse use, propagation/cuttings of bedding plants and potted plants

Ingredients: Canadian Sphagnum Peat Moss, Perlite, Starter Charge, Dolomitic & Calcitic Lime, Wetting Agent

Coir Mix

Description & Ideal Uses: Coir Mix is a great option for growing on the dry side. Similar to vermiculite, coconut coir improves wetting and rewetting of mixes without sacrificing crucial air porosity. This widely used blend is designed for flats up to 12" containers.

Ingredients: Canadian Sphagnum Peat Moss, 3/8" Southern Pine Bark Fines, Coconut Coir, Perlite, Starter Charge, Blue Chip, Dolomitic & Calcitic Lime, Wetting Agent

Flat and Pack Mix

Description & Ideal Uses: A versatile blend for any greenhouse operation, the original Flat and Pack mix is a tried and true peat based greenhouse blend. This mix is ideal for flats up to 12" containers.

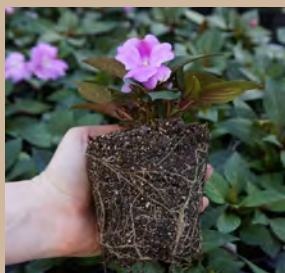

Ingredients: Canadian Sphagnum Peat Moss, 3/8" Southern Pine Bark Fines, Perlite, Starter Charge, Blue Chip, Dolomitic & Calcitic Lime, Wetting Agent

Flat and Pack with Parboiled Rice Hulls

Description & Ideal Uses: This popular variant of Flat and Pack includes parboiled rice hulls which is a sustainable, cost effective alternative to perlite. Parboiled rice hulls perform just as well as perlite in creating air porosity, without the tendency to persist in the landscape. This versatile mix is ideal for flats up to 12" containers.

Ingredients: Canadian Sphagnum Peat Moss, 3/8" Southern Pine Bark Fines, Parboiled Rice Hulls, Starter Charge, Blue Chip, Dolomitic & Calcitic Lime, Wetting Agent

Flat and Pack Plus

Description & Ideal Uses: The addition of vermiculite in the Flat and Pack Plus helps the mix retain moisture, increase nutrient holding capacity and help to buffer the pH. One of the more widely used blends in the industry, it is optimized for flats up to 12" containers.

Ingredients: Canadian Sphagnum Peat Moss, 3/8" Southern Pine Bark Fines, Coarse Perlite, Medium Vermiculite, Starter Charge, Blue Chip, Dolomitic & Calcitic Lime, Wetting Agent

Basket & Planter Group

Pine bark mixes have ample drainage and are suited for containers greater than 4" or for longer term crops

Basket Mix

Description & Ideal Uses: Designed for hanging baskets, this mix contains coconut coir to improve wetting and rewetting of mixes. In addition to baskets, this mix is well suited for container sizes 6" and up.

Ingredients: 3/8" Southern Pine Bark Fines, Canadian Sphagnum Peat Moss, Coconut Coir, Perlite, Starter Charge, Blue Chip, Dolomitic & Calcitic Lime, Wetting Agent

High Porosity Mix

Description & Ideal Uses: High Porosity Mix is a pine bark based growing media that is well suited for larger containers. It holds up well to settling and degradation over longer crop cycles. This mix is ideal for container sizes 4" and larger. Also great for shifting up smaller plants and production of premium 4"-6" annuals.

Ingredients: 3/8" Southern Pine Bark Fines, Canadian Sphagnum Peat Moss, Perlite, Starter Charge, Blue Chip, Dolomitic & Calcitic Lime, Wetting Agent

Large Container Mix

Description & Ideal Uses: This blend contains coarse pine bark to maintain stability of the soil structure and porosity over longer crop cycles. Coconut coir improves wetting and rewetting of mixes and reduces shrinkage from dry down cycles. Ideal for mixed planters or specimen annuals and perennials in 12" containers and larger.

Ingredients: 1/2" Southern Pine Bark Fines and 3/8" Southern Pine Bark Fines, Canadian Sphagnum Peat Moss, Coconut Coir, Starter Charge, Blue Chip, Phosphorous, Dolomitic & Calcitic Lime, Wetting Agent

Mum Mix Original

Description & Ideal Uses: Cost effective growing media that is well suited for mum production and can be used for many crop types and container sizes. Incorporated controlled release fertilizer is available upon request.

Ingredients: 1/2" Southern Pine Bark Fines and 3/8" Southern Pine Bark Fines, Canadian Sphagnum Peat Moss, Perlite, Starter Charge, Blue Chip, Phosphorous, Dolomitic & Calcitic Lime, Wetting Agent

Mum Mix with Parboiled Rice Hulls

Description & Ideal Uses: Cost effective media, with parboiled rice hulls ideal for 8" containers, baskets and half bushels

Ingredients: 1/2" Southern Pine Bark Fines and 3/8" Southern Pine Bark Fines, Canadian Sphagnum Peat Moss, Parboiled Rice Hulls, Blue Chip, Dolomitic & Calcitic Lime, Phosphorus, Starter Charge, Wetting Agent

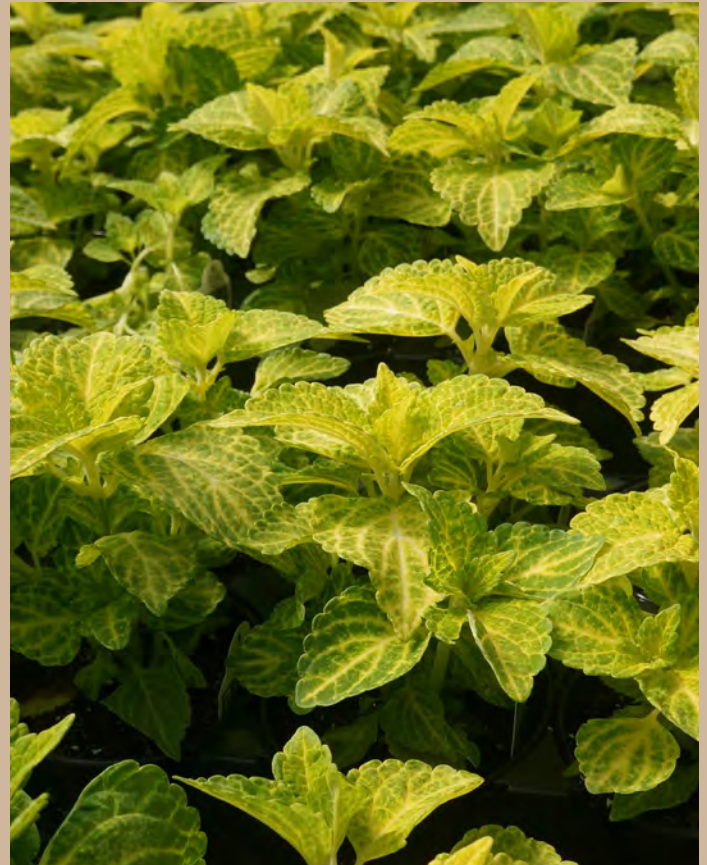

Poinsettia Mix (Peat Based)

Description & Ideal Uses: Cost effective growing media that is well suited for poinsettia production and can be used for many crop types and container sizes.

Ingredients: 50-60% Canadian Sphagnum Peat Moss, Coconut Coir, Perlite, Dolomitic & Calcitic Lime, Starter Charge, Phosphorus, Wetting Agent
